HAXLR8 3.0 — Flight Rulebook & Protocols

Department of Electronics & Communication Engineering · Maharaja Institute of Technology
Mysore

**24-HOUR
FINALE**

NOV 06–07, 2026

 **HAXLR8 3.0 Mission Charter:** An offline, national-level 24-hour hackathon designed to cultivate breakthrough innovations across Agriculture, Healthcare, and Smart City technologies. All registered teams advance directly to the 24-hour grand finale on campus.

1. TEAM COMPOSITION & ELIGIBILITY

SQUAD STRUCTURE

- Squads must consist of **3 to 4 undergraduate students**.
- Solo or 2-member participations are strictly prohibited.
- Inter-college and inter-branch teams are 100% permitted.

LEADER COMMAND PROTOCOL

- Only the designated **Team Leader** registers the squad account.
- Crew members are listed on the squad manifest inside the leader's dashboard.
- All members must bring official college ID cards on launch day.

2. REGISTRATION & FEE VERIFICATION

- **Fee Structure:** ₹1,200 fixed fee per squad (covers all 3–4 members, 24-hour campus entry, meals, Wi-Fi, workstations, mentorship, and participation certificates).
- **Payment Verification:** Leaders submit transaction UTR and screenshot via the official Payment & Verify portal. Verified teams unlock their official **Payment & Registration Receipt**.

3. DOMAINS & PROBLEM STATEMENTS

HAXLR8 3.0 features 3 transformative tracks aligned with global challenges:

-  **Agriculture & Food Tech:** AI crop protection, smart irrigation, post-harvest robotics, soil health telemetry.
-  **Healthcare & MedTech:** Tele-health diagnostics, portable medical devices, clinical AI triage, rural accessibility.
-  **Smart City & Urban Systems:** Intelligent traffic corridors, automated waste sorting, civic safety, municipal energy grid management.

 **Problem Statements Release Protocol:** Detailed problem statements will be officially unlocked on **November 2nd, 2026 (12:00 PM IST)**. Official hackathon flight passes will be issued to confirmed squads at that time.

4. 24-HOUR OFFLINE HACKATHON LOGISTICS

WORKSTATION PROVISIONS

- Dedicated team desk with multi-plug power access.
- High-speed campus Wi-Fi infrastructure.
- Catering: Day 1 lunch, evening snacks, midnight refreshments, Day 2 breakfast.

CODE OF CONDUCT & ETHICS

- All solution code must be built during the 24-hour sprint.
- Open-source libraries and APIs are fully permitted.
- Plagiarism or pre-built complete prototypes lead to immediate disqualification.

5. EVALUATION MATRIX (100 POINTS TOTAL)

Evaluation Parameter	Weight	Key Criteria Evaluated
Innovation & Originality	25%	Uniqueness of the concept, novelty of the approach, creative problem-solving.
Technical Feasibility & Depth	25%	Architectural soundness, code quality, sensor/API integration, technical challenge overcome.
Real-World Impact & Scalability	25%	Practical deployment viability, social/economic impact, sustainable scale potential.
Presentation & Live Prototype Demo	25%	Clarity of jury pitch, live working demonstration, handling of Q&A defense.

6. OFFICIAL CONTACTS & SPACE COMMAND

FACULTY COORDINATORS

Dr. Balakrishna K (HoD & Associate Prof, ECE): +91 98864 78574
Prof. Sandesh NG (Assistant Prof, ECE): +91 94813 36585

STUDENT COORDINATORS

Yashwanth H B (Chief Flight Engineer & Tech Lead): +91 80506 14849
Chethan Kumar B (Mission Operations Lead): +91 99455 07099
